

“Market Research and Monitoring on the leather industry in selected Asian countries: China, Indonesia, Philippines, Vietnam”

STUDY REPORT: TRADE STATISTICS' APPENDIX

Contract n. ASI/B7-301/95/108-35
Account number ALA 95/25

This text has been drafted with the financial assistance
of the Commission of the European Communities.

The views expressed herein are those of Unione Nazionale
Industria Conciaria and therefore in no way reflect the official
opinion of the Commission.

The Study Report - Trade Statistics' Appendix is the final part of the Market Survey.

It analyzes trade flows between European Union and Far East main countries with details on Italy's share and contains a wide range of statistics on selected sub-sectors of the whole leather industry, based on the elaboration of the project partners from data provided by the following institutions:

EUROSTAT

DataShop Eurostat Luxembourg

TABLE ON ITL/ECU (EURO) CONVERSION RATE	Page 180

NOTES ON STATISTICS' NOMENCLATURE

The customs nomenclature

In order to identify the trade of merchandises and to determine their value according to different measure units such as currency, weight, number of pieces, etc., many international standard classifications are utilised.

The most widespread are the HS (acronym for Harmonised System), compiled by the World Customs Organisation (WCO) and the SITC (acronym for Standard International Trade Classification) of the United Nations.

The HS system assigns to every product an 8, 9 or 10 digit code, depending on the country, of which the first 6 are the same all over the world.

The SITC classification, in its most recent version - Revision 3 -, assigns a 5 digit code to the traded goods. The disaggregation of SITC is lower than HS', so that it's possible to convert HS data into SITC but not viceversa.

The nomenclature of the study

Trade flows between Europe and the countries object of the study have been analyzed by mean of electronic statistics based on HS classification. Currently the following data are available:

- Foreign trade of Italy (source ISTAT)
- Foreign trade of Spain (source EUROSTAT)
- Foreign trade of European Union (source EUROSTAT)
- Foreign trade of China (source CHINA CUSTOMS)
- Foreign trade of South Korea (source SOUTH KOREA CUSTOMS OFFICE)

Following a major harmonisation in EU countries in the recent years, the first three groups of data share the same 8 digit codes, whereas China and South Korea adopt slightly different codes (for Korea a 10 digit system).

As regards the ISTAT and EUROSTAT data, the chapters covered by the market study are the following:

- Chap. 28 Tanning chemicals
- Chap. 32 Tanning chemicals, Accessories

Chap. 34	Tanning chemicals, Accessories
Chap. 35	Tanning chemicals, Accessories
Chap. 38	Tanning chemicals
Chap. 39	Tanning chemicals, Accessories
Chap. 40	Accessories
Chap. 41	Skins and leathers, Accessories (composite leather)
Chap. 42	Leather goods and leather garments
Chap. 43	Rabbit and sheep leather with wool on
Chap. 54	Accessories
Chap. 55	Accessories
Chap. 56	Accessories
Chap. 58	Accessories
Chap. 59	Accessories
Chap. 64	Footwear and footwear components
Chap. 82	Accessories
Chap. 83	Accessories
Chap. 84	Tanning, footwear and leather goods machinery, sewing machinery and their spare parts

Eurostat data consider trade flows of all EU current members (15) for the entire time series; data for year 2000 refer to period January-May.

To date, statistics on China cover the chapters:

Chap. 41	Skins and leather
Chap. 43	Rabbit and sheep leather with wool on
Chap. 64	Footwear components

For South Korea only the data for chapter 41 - skins and leather - are currently available.

By grouping the above customs codes we have created 7 families of homogeneous products:

- Skins and leather
- Footwear
- Leather goods
- Shoe components
- Accessories

- Machinery
- Tanning chemicals

The products belonging to the same family are defined by a matrix structure. More in detail:

Skins and leather: products are classified by animal origin (for example bovine, sheep, goat, etc.) and by stage of processing (raw, semi-finished, finished, etc.). In the origin **Other** are included all the types of reptile, swine, and equine leather. Patent and metallised leather belongs to this category, too, regardless of its animal origin. Customs codes cannot distinguish between, say, patent leather from bovine and metallised leather from sheep.

Footwear: they are grouped by upper's material and the type of shoe. Leather upper footwear is further broken down into leather sole and other materials' sole.

Leather goods: this variegate group is made of three sub-groups. In the first, items such as trunks, cases, handbags and their pocket accessories, which include wallets, cigarette cases, key-chains, etc., are further defined by the materials used (for example leather or synthetics). The second one, encompassing leather garments and garment accessories, is broken down into a few articles such as apparel, belts, etc. given that they're manufactured with the same material. Finally the third sub-group includes the remaining leather products, which include saddlery, harness and other leather items (for example, a leather pen holder).

Shoe components: with a few exceptions, these products are specified by the type of component and its materials.

Accessories: this aggregate, probably the widest in terms of variety, comprises many intermediate industrial products. At the first level we have created families of similar products: fabrics, non woven fabrics, adhesives, foils and varnishes, rubber, metal accessories, other accessories. This last one includes, for instance, buckles and eyelets, sewing thread for footwear, and so on.

Machinery: this aggregate is made of three sub-groups: firstly, tanning, footwear and leather goods machinery; secondly, industrial sewing machinery; thirdly, the spare parts of the above machinery.

Tanning chemicals: similarly to the accessories, there are many different types of tanning chemicals. The sub-groups comprise similar typologies of chemicals, more precisely: vegetable tannins, synthetic tannins, salts and bactericides, surface-active agents, resins and fatliquors, dyes and pigments, finishing products.

A detailed scheme of tariff customs codes used for the processing of trade data are enclosed in the next pages:

EUROPEAN UNION: HS customs codes for skins and leather
